Final-year Computer Science student with experience in software development, automation, and data analysis. I have worked on full-stack applications, process digitization, dashboards, and the integration of AI-based solutions.

EXPERIENCE

Pinturas Panoramica

Software Development Intern

Dec. 2025 – Feb. 2026

Lautaro, Chile

- I developed a **full-stack web platform** using React, Express.js, and PostgreSQL to digitize internal operational processes.
- I implemented and deployed modules for **warehouse management (WMS), transportation (TMS), production, and risk prevention**, replacing Excel and paper based workflows.
- I developed an **authentication and access control system based on roles and areas (RBAC)** using Passport.js.
- I built **dashboards and operational KPIs** to centralize and facilitate the tracking of plant data.

PROJECTS

Academic Schedule Platform

- I developed a centralized platform for looking up academic schedules by course, room, and instructor, replacing information scattered across Excel, PDFs, and other systems.
- I implemented **MongoDB** to manage semi-structured academic data and **Docker Compose** to standardize deployment on an on-premise server.
- Project presented as a paper at the **SOCHEDI 2025 Congress**.

QR Attendance System

- I developed a web platform to digitize attendance tracking for teaching assistant sessions and tutoring sessions using real-time **QR code generation and validation**.
- I implemented the backend using **FastAPI and PostgreSQL**, including the logic for generating, validating, and recording attendance.

Academic Mobility Dashboard

- I developed a **student and academic mobility KPI dashboard** to support the visualization of indicators defined in a university research project.
- I implemented a full-stack application using **React, Django REST, and PostgreSQL** to manage, query, and visualize the indicators.

EDUCATION

Autonomous University of Chile

B.S. in Computer Science

Mar. 2022 – Present

Temuco, Chile

SKILLS

Languages : Python, JavaScript, TypeScript, Java, SQL

Backend & Web : React, Node.js, Express.js, FastAPI, Django REST, REST APIs

Data & ML : Pandas, NumPy, Scikit-learn, Matplotlib, Keras

Databases : PostgreSQL, MongoDB, MySQL

Tools & DevOps : Git, GitHub, Docker, Linux, CI/CD

AI & Automation : OpenCode, Claude Code, Codex, API/LLM integration

Languages : Spanish (Native), English (Intermediate)

Soft Skills : Teamwork, problem-solving, adaptability, effective communication
